

Arsen Arakelyan

3 years of design experience. User-focused, combining empathy, attention to detail, and analytics to make complex things simple and clear.

WORK EXPERIENCE

MTS Fintech · Product Designer

May 2026 – present

Working on an internal bank product — developing an HR platform and designing portal solutions for employees. Creating complex, data-dense interfaces and systems. Focus — making internal services intuitive and user-friendly, reducing support requests and increasing eNPS of internal products.

Freelance Projects · Product Designer

October 2024 – July 2025

SBER

Created a payment terminal configurator with cases, colors, and new features (tips, loyalty programs). Testing results: +25% likelihood of choosing a custom model among B2B respondents.

VIBES DATE

Developed visual collage-questionnaire mechanics for a dating app. Designed onboarding, matching, and messaging flows. Results: +20% matches converting to conversations, +35% average messages per match, increased proactive messaging in MVP tests.

T-Journal

Developed scenarios and interfaces for a travel planning dashboard. Designed solutions motivating users to sign in via T-id. Prototype tests showed increased sign-in intent: +13% in self-reported readiness.

GISMU · UX/UI Designer

September 2024 – October 2024

Participated in GISMU UI kit refactoring and design system improvement. Proposed updates increased consistency and reduced time to build new screens.

MDS Design Studio · Designer

September 2022 – July 2025

- Graphic design
- Landing page layout
- Banner design
- Icon and graphic development

Initiated the integration of AI tools into design processes: independently explored image generation tools, ran tests, formalized the approach as a guideline, and trained the team.
